

This is your prefrontal cortex.

It helps you make safe choices, and it's still growing.

That can make it hard to decide if something is risky or not.

The fact is taking pills that aren't prescribed to you is never safe.

Illicit fentanyl is a street drug that can cause overdose or death. It's showing up in fake pills that look like real prescription OxyContin, Adderall, Percocet, and Xanax. The risk to your brain and body just isn't worth it.

Everyone deserves to live,
and anyone can be a friend for life.
